

Spring Walk

How many of these things can you spot?

Chaffinch		A bee	Now you have walked around the Reserve and hopefully spotted some of the things on the list and some things not on the list, try to find answers to these questions.
Wren		A butterfly	
Greenfinch			
Blackbird		A bird using a nest box	
Great spotted woodpecker			
House martin		Toads	
Curlew		Frogs	The Water Vole Where does the Water Vole live on the reserve? What does he eat? Why does he groom his coat?
Lapwing		Stickleback	
Great tit		Freshwater shrimp	
Holly flowers		Snail	
Catkins		Slug	There can be lots of invertebrates around the reserve, caterpillars and butterflies, various insects, bugs and beetles, spiders, snails and slugs. What can you find out about the invertebrates that live on the reserve?
Larch flowers		Spider	
Primrose			
Wood Sorrel		Caterpillars on leaves	
Celandine		Holes in leaves	
Mole hills		A Water Vole	There are lots of animals on the reserve and they eat lots of different things - can you find out what the animals on the list opposite eat?
Rabbit droppings		A Grey Squirrel	
		A Roe Deer	
			Birds' beaks often indicate what and where they eat, can you find out about this? (Use the birds in the list opposite.)
Deer foot prints			
Human foot prints		New pine needles on conifer trees	
Dog footprints		A fern frond uncurling
